Important information

Each reflect product must be marked by **CE sign + Model no. + Prod.date + Name of manufacturer+ EN13356** re. new PPE (Personal protective equipment) Regulation (EU) 2016/425.

The standard insert is included in a packing. Insert size: 26 x 235 mm, the legal text is translated to the following languages: GB / DK / SE / NO / FI / DE / PL / FR / ES / IT / NL / SK / CS / EE / LV / LT / RU.

Please be informed that the colours will be tinted down under the reflective material.

PRINT UNDER   PRINT ON

Please be aware that we print under the reflective film to ensure that the reflective product is also approved after printing. This will make your logo less visible, but you are guaranteed an approved product.

If you are unfamiliar with how this will look or are unsure of anything, please contact and request photo / samples before approving this layout.

Please check carefully, as we are not liable for any errors or failures after your approval.

Pay attention to:

- Placement of print;
- Size of print and repetitions;
- Proofreading (letters and numbers);
- Printing colours.

Be especially aware that there may be altered in colour code, for example, from CMYK to Pantone C (PMS).

We will match colour to the best of our ability but we do not guarantee a 100% Pantone C colour match.

For PRINT ON the reflective material:

- PMS colour code is required.
- The print area should be less than 30% of the total external surface area.

Any changes made to the originally delivered design ie. number of colours, repetitions, placement etc., is subject for additional costs.

This could mean that your confirmed price is no longer valid, so please check with your contact before making any changes.

NOTE! Approval ONLY per E-mail.
